

Starting of operations Homopolymers

Installed Capacity 74K tons/year

**1988**

**1990**

Random Copolymers

**1992**

Impact Copolymers

Integration of the 4<sup>th</sup> Generation ZN Catalyst (PTK)

**1996**

**1997**

Distillation increase 90K tons/year

**1998**

Reactor Blends

**1999**

Terpolymers

**2000**

Random Type III

Terpolymers SIT > 100°C

**2001-2003**

**2003**

Random Block

**2005**

New extrusion line 120K tons/year

**2010**

Various debottle necking 130K tons/year

Starting of operations Homopolymers

Installed capacity 100K tons/year

**1992**

**1994**

Installed Capacity 130K tons/year

**1999**

Increase in the distillation capacity

Installed capacity 180K tons/year

Opening PPC 12K tons

Start of bulk production

**2000**

**2002**

PPC 21K tons/year  
Incorporation of new line

Increase of capacity of massive production

**2009**

**2012**

Catalyst change PP Plant

GIP Group

**2016**

**2017**

Optimization Catalytic System  
More than 180K tons/year capacity

**2018**  
Merger
